

MMIS, MITA & HIT Integration

A CMS Perspective

Bob Guenther
Division of State Systems
Center for Medicaid and State
Operations

MMIS Background

- Born as a Mainframe Claims Processor
- Requirement of Title XIX
- Business and Technical Silo
- Expensive to Build and Maintain
- Has Matured but Slowly

Introduction of MITA

- Post Y2k ~ circa 2002
- Business-Driven Approach
- Federal/State Collaboration
- Looked to other Industries for Models
- Decided on a Framework Approach

MITA Principles

- Reference Architecture
- Business & Beneficiary Centric
- Improves Business Through Maturity Levels
- Relies on Standards and Promotes Reusability
- Shared Services & Applicability Beyond T19

MITA & HIT Integration

- MITA Level 3 + HIT/HIE Oriented
- Level 4 = Introduction of Clinical Data
- Intra and Inter State Data Exchanges
- Work with CONNECT on NHIN
- Looking to Integrate with Human Services
